Turboliner News

In mid-2026, the Railway Excursion Management Company (Railexco) purchased the entire RTL III Turboliner trainset (Power cab/coach cars 2135 and 2158, two full coach cars, and one coach/food service car) that had been stored at Amtrak's Cedar Hill Yard in New Haven, Connecticut since 2018. According to the Railexco website, "A portion of the trainset is being set aside for first responder training while two coaches and one power car will be retained by Railexco for conversion into a turn-key excursion trainset hauled by a conventional locomotive." As this story unfolds, we will post updates on this segment of our website. Shown below, are photos of the purchased trainset taken at Cedar Hill Yard in New Haven.—
